## “ifs Italia - Solution Provider for Utilities”

### Origins

ifs Italia has been founded in 1996 by ifs GmbH, an IT company based in Germany that offered IT systems to utility companies across Europe, and becomes a privately held Italian company in 2000 when the local shareholders acquired the company through a “Management buy-out”. Since then, ifs Italia has grown becoming a leading “Solution Provider for Utilities”.

The Product/Service portfolio has evolved in parallel including solutions to fully manage the life cycle of the “**Energy Management**” processes in **Generation, Distribution, Transport, Sales, Trading and Shipping**.

### Mission

Anticipating the evolutions of the Energy market and subsequent requirements of IT systems, we identify international product partners who offer technologically advanced and functional “best-of-breed” solutions, delivered either “**on premises**” or as “**Software As A Service**”, according to customer needs.

The close collaboration with our Partners offers our customers the advantage of having a **unique interface for all technical and commercial matters**. Furthermore, these partnerships between ifs and the vendors on one side and ifs and the customers on the other, guarantee the **timely evolution of the products and services** according to **new requirements of the market and compliant to local Regulation**, minimizing the operational risks of our customers.

### Lines of Business

ifs Italia and the Product Partners address the Energy market requirements in the areas of:

- **EDM (MeterToCash, MeterToForecast, MeterToPortfolio...)**
- **Automation of data communication** among market Operators (DSO, TSO, Dispatchers, country hubs, exchanges)
- **Forecast** (Demand, Prices, Renewables)
- **Portfolio and Risk Management**
- **Portfolio and Generation Optimisation**
- **Scheduling/Nomination**
- **Billing & CRM**
- **Meteo Data and Energy Fundamentals**
- **Energy Data Analytics**
